WondAR

Augmented Reality Zoo
for big screens

Experience the latest generation of big screen augmented reality (AR), with Hollywood quality immersive 3D animation, photorealistic models, unmatched video resolution and Dolby Surround sound. Our AR system provides unique entertainment for young and grown-up audience, individuals as well as groups of visitors.

The WondAR system can be connected to indoor and outdoor screens. The system works best for street marketing, zoos, visitor centers, play houses for children, museums, digital exhibitions and shopping malls. WondAR offers ready-to-go contents as well as customized 2D or 3D animation.

Our ready-to-go content packages include an Asian Jungle theme and a Dinosaur World animation, with total duration of over 4 minutes.

What makes WondAR system and contents unique?

It provides 4K UltraHD video resolution (3840x2160 pixels)
